

Who The Cuss is Tyler Brough?

I will now proceed to entangle the entire area...

Research: Computational Statistical Catalectics

What is Catallactics?

Hayek:

"... the order brought about by mutual adjustment of many individual economies in a market. A catallaxy is thus the special kind of spontaneous order produced by the market through people acting within the rules of the law of property, tort and contract."

Buchanan:

"The elementary and basic approach that I suggest places '*the theory of markets*' and not the 'theory of resource allocation' at center stage. **My plea is really for the adoption of a sophisticated '*cata*llactics'.**"

Some Notes

- One of my favorite things to do is read. Here are some books that I am currently reading:
 - *English Creek* by Ivan Doig
 - *The Wisdom of Insecurity* by Alan Watts
 - *The Soul of Christianity* by Huston Smith
 - *Applied Predictive Modeling* by Kuhn & Johnson
 - *Computational Statistics Handbook 3rd Edition* by Martinez & Martinez
 - *How to Take Smart Notes* by Sonke Ahrens
 - *The Bullet Journal Method* by Ryder Carroll
- I enjoy hiking, backpacking, traveling, roadtrips, etc
- I love blues, country, folk, rock and other forms of Americana music
- I very badly want to play fingerstyle guitar, but unfortunately that is how I play.
